

FIRENET

ADAPTING TO WILDFIRE

STAKEHOLDER ADVISORY COMMITTEE MEETING #3, JAN 25TH 2022

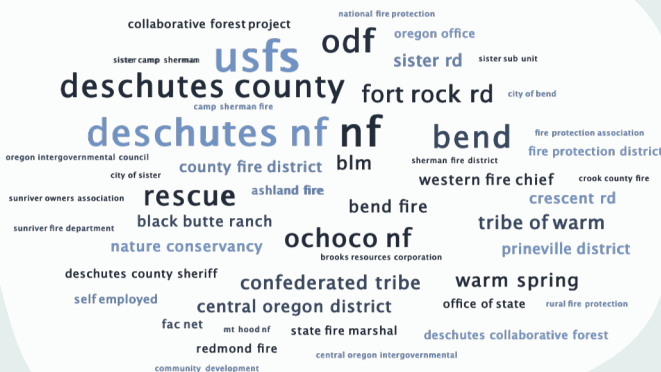

WILDFIRE MANAGEMENT NETWORK

210 individuals work on wildfire risk management within Central Oregon, representing 800 or more distinct working relationships. 50 organizations, most working across multiple jurisdictions. Partnerships involved all three domains of the cohesive strategy. Most actors played multiple roles.

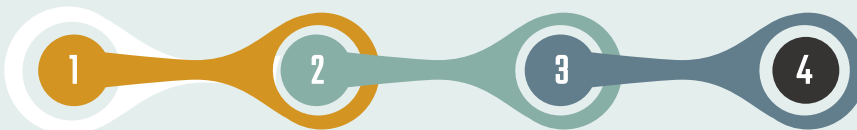

WHY NETWORKS?

Wildfire management involves partnership that cross governmental and organizational boundaries. Understanding collaborative governance requires first understanding who is involved.

ORGANIZATIONS

TITLES

- Roles**
How individual roles help achieve a fire adapted future
- Influence**
How social influence impacts fire outcomes
- Networks**
Exploring the fire network in Central Oregon
